International Asia Veterinary Conference & Exhibition: Discover Leading Products and Solutions for Optimizing Veterinary Practice

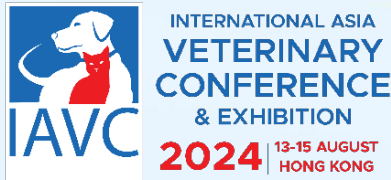

[6 August 2024, Hong Kong] The International Asia Veterinary Conference & Exhibition (IAVC) 2024, a premier event encompassing both an expo and conference, is set to redefine industry standards from 13-15 August 2024 at AsiaWorld-Expo, Hong Kong. This pivotal gathering serves as a dynamic platform for veterinarians from around the globe to come together, share innovative ideas, and forge valuable peer connections. Alongside world-class educational sessions designed for pet veterinarians, the event will feature an extensive array of exhibitors, presenting the latest products and solutions that enhance veterinary practices and advance pet care.

City U Veterinary Medical Centre: Leading the Charge in Veterinary Diagnostics

The CityU Veterinary Diagnostic Laboratory offers diagnostic testing solutions for practising veterinarians in Hong Kong.

At the forefront of veterinary sector, the CityU Veterinary Diagnostic Laboratory from City U Veterinary Medical Centre will be showcasing its leading-edge diagnostic solutions at IAVC 2024. Specializing in rapid and accurate diagnosis, the laboratory employs the latest technology to assist practicing veterinarians in Hong Kong with timely therapeutic interventions for pets and animals. In collaboration with City University scientists, the laboratory has pioneered the latest diagnostic techniques incorporating artificial intelligence, setting a new benchmark in veterinary diagnostics. These advanced methods not only enhance the precision of diagnostics but also

ensure swift communication of results, prioritizing animal health and facilitating immediate treatment to prevent suffering.

Ringpai Pet Hospital: Expanding Horizons in Veterinary Services

Ringpai Pet Hospital, a renowned name in China's pet medical industry, is set to make its mark on the international stage at IAVC 2024. This event marks Ringpai's first foray into Hong Kong, highlighting its expansion through the "acquisition + self-build" model in response to China's "Belt and Road" initiative. The hospital will showcase its comprehensive approach to pet diagnosis and treatment business, as well as its expertise in veterinary team building. This presence underscores Ringpai's commitment to fostering international collaborations and sharing best practices across borders.

Tianjin Ringpu Bio-Technology's Groundbreaking Products

Tianjin Ringpu Bio-Technology Co., Ltd. is set to showcase its pioneering products, highlighting their impact on veterinary care. The RINVAC F RCP, for example, is the first Chinese brand tri-cat vaccine, which has broken the monopoly of foreign brands in China and leads the market in feline vaccine sales. Additionally, Ringpu will introduce Surenil, an innovative ciclosporin oral solution for allergic dermatitis in dogs and cats, and Mopsion, imidacloprid and moxidectin drops designated for the prevention and treatment of internal and external parasitic infestations in dogs and cats.

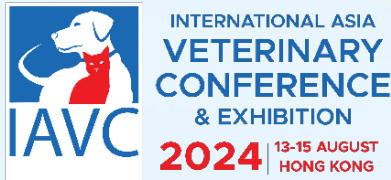

These products exemplify Ringpu's extensive capabilities, supported by 11 factories and 97 GMP production lines across China, emphasizing their global leadership in veterinary solutions. The display at IAVC 2024 will not only highlight Ringpu's significant contributions to veterinary medicine but also offer attendees a firsthand experience of advancements that are setting new standards in veterinary care and treatment efficiency.

A Confluence of Expert Minds

IAVC 2024 will feature over 15 veterinary experts from across the globe, each bringing unique insights into the evolving landscape of veterinary science. The conference schedule includes keynotes, panel discussions, and technical sessions that delve into the latest advancements and best practices within the veterinary field.

Continuing Professional Development Opportunities

Participants will have the opportunity to earn CPD points, fostering career advancement and enhancing their expertise in veterinary medicine. This focus on professional development underscores the conference's commitment to advancing the veterinary profession through continuous learning.

We invite media representatives and veterinary professionals to experience this transformative event. Media credentials will be provided onsite for qualified journalists and photographers who present a business card.

Tickets for IAVC 2024 are available now. Secure your participation and join us in shaping the future of veterinary medicine by visiting <https://www.iavc.asia>.

###

About the Organizer

Pets Central Veterinary Academy Ltd. (PCVA) is the education arm of Pets Central Veterinary Network. Its mission is to provide well-rounded veterinary and animal care education. It has developed courses to support veterinarians, veterinary support staff, and pet parents. PCVA has been running a successful series of courses since 2010 in collaboration with the Hong Kong Federation of Youth Groups. The lectures introduced the roles in animal care of veterinarians, veterinary assistants, receptionists, customer service and pet parents. In 2018, PCVA started a lecture program with Vets Central, an online tele-vet and education platform that supports veterinarians who want to learn and get practical advice from U.S. and E.U. veterinary specialists.
